

Be Right™

SWAS Panels

Hach's Steam and Water Analysis System (SWAS) measures degassed cation conductivity, silica, and sodium, and helps to protect and reduce the downtime of your plant. This comprehensive approach also includes a steam reduction unit as well as preinstalled hydraulic and electrical connections for standard fittings and electrical I/O signals.

Part Number	Product description	Parameter	GBP Price
LYP105.99.XXXX1	SWAS Panel, 2 Parameters	Degassed cation conductivity, silica	Contact Us
LYP105.99.XXXX2	SWAS Panel, 3 Parameters	Degassed cation conductivity, silica, sodium	Contact Us
