

A-ISE sc Sensors

Hach's digital, ion-selective A-ISE sc probe is designed for the determination of ammonium concentration directly in the medium. Calibration-free with automatic potassium compensation. The sensor features easy handling and low maintenance due to Cartrical sensor cartridge. A-ISE sc is particularly cost-effective in terms of installation and operation, even for small wastewater treatment plants.

A-ISE sc Sensors can be connected to all SC controllers, providing versatile output options including 4-20 mA Output, Modbus RS485, Profibus, or Hart.

Prognosys is a predictive diagnostic system that allows you to be proactive in your maintenance, by alerting you to upcoming instrument issues. Know with confidence whether changes in your measurements are due to changes in your instrument or your water.

Claros Enabled products share measurement data and status information with Claros - The Water Intelligence System from Hach. Claros provides greater confidence in your data, resulting in improved efficiencies in your plant's operation. To ensure you achieve the full benefits of Claros, insist on Claros Enabled instruments.
