

## Digital Titrator Test Kits

Hach digital titrators use a high-precision dispensation device and replaceable titrant cartridges for highly accurate results in the field or lab. More than 50 different parameters and/or ranges are available to suit many testing applications. Each kit includes comprehensive instructions, apparatus, reagents, and a rugged carrying case.

Quick-change cartridges allows the user to switch parameters in seconds, and each cartridge provides between 40-100 titrations, depending on sample concentration. Common parameters available include Total hardness, Chloride, Sulfide, Carbon dioxide, and Acidity.
