

## EZ Series Tin Analysers

The EZ Series Online Analysers offer two options to monitor total and dissolved Tin in water. Typical applications are drinking water, surface water, industrial effluent.

The EZ6000 Series Analysers use voltammetry to determine Tin:

- EZ6012 Tin Sn(II), dissolved
- EZ6210 Tin, total

Standard measuring range: 0 - 100 µg/L

Options for all analysers include:

- Internal dilution
- Multiple stream analysis (1-6 streams) reducing cost per sampling point
- Analogue and/or digital outputs for communication

Some applications may require the use of a sampling/filtration or an external dilution system for sample preconditioning. For this option please check the EZ9000 Sample preconditioning page.
