

SC200 Controller

The SC200 Universal Controller is the most versatile controller on the market. It allows the use of digital and analogue sensors, either alone or in combination, to provide compatibility with the broadest range of sensors. It replaces the Hach SC100 digital and GLI53 analogue controllers with advanced features for easier operator use. The SC200 controller can be configured to operate two digital sensor inputs, two analogue sensor inputs, or a combination of one digital and one analogue input. Customers may add communication modules for a variety of protocols including Modbus 232/485, Profibus DPV1, and HART.

- Maximum Versatility
- Ease of use and confidence in results
- Wide variety of communication options
